

A: Rule across entire text block

B: Rule from left margin across entire page

C: Rule from left margin across entire text block + 2cm

D: Rule from right margin across entire page

E: Rule from right margin across entire text block + 2em

G: Rule from right margin across entire text block + 2em with 0.7pt width

H: You can make use of minipage, `\parbox`, and `\pbox` to embed paragraphs in non-paragraph boxes. For instance:

Some very long text
that would not be allowed
in an fbox.

Some ~~text~~ this text

~~Censor~~ ~~Ad~~ ~~Text~~

Guess I'm framed now!

Bummer, I am too wide

never mind, so am I

Can you read this?

This is an easy way to box text within a document!
