Director
Unique Seed Company Pvt. Ltd.
Dhangadhi
Kailali, Nepal

Dear Sir

I am writing to you to express my interest to work in your company. I have come across your company's hiring plan through a reputed academic and I would like to be considered for the position of Plant Breeder.

That said, allow me to express that the opportunity to work in the abovementioned position will be a passionate journey to ideal realization of my academic interest. I am a prospective post-graduate in Genetics and Plant Breeding studies.

While working on a recent research project, which although serves mostly for a academic degree, I have gained substantially as to what an ideal field researcher in Plant Breeding should be. Since the field is ever-expanding in how and what it contributes to globally, let alone in National context, personally, I have come to realize that building upon experiences and having a clear vision is as important in the field of industry oriented Plant Breeding. After all, a seed of potentially impactful kind starts off as merely an off-type in a larger context.

In citing my relevant experiences so far, I have successfully sought for a research problem mostly using exploratory techniques, written a funding proposal, designed an experiment accounting for both variabilities and resource constraints, performed data gathering, and employed various descriptive and inferential statistics for analytical purposes. I have also developed an alert perspective on reproducible research and report presentation, which I believe your company will benefit the most.

I welcome any opportunity to discuss on how I can bring about positive contribution to your company. Thank you for your time and consideration. I look

forward to your reply.

Yours Faithfully,

Deependra Dhakal

P.S. You can find an updated CV attached herewith the mail and also at <http://deependrad.github.io/>.
